

## Chemistry Report for Case # P-17-0023

### General

<b>Submitter:</b> [REDACTED]	
<b>Contact:</b> [REDACTED]	<b>Contact Telephone No.:</b> [REDACTED]
<b>TS No.:</b> 007898	
<b>Chemist:</b> [REDACTED]	<b>Contractor Support:</b> Y
<b>PV Init (kg/yr):</b> [REDACTED]	<b>PV Max (kg/yr):</b> [REDACTED]
<b>Binding Option:</b> <input checked="" type="checkbox"/>	<b>Exposure-Based Review:</b> <input checked="" type="checkbox"/>
<b>Manufacture:</b> <input type="checkbox"/>	<b>Import:</b> <input checked="" type="checkbox"/>

**CAS Number:** 1072-53-3

**Chemical Name:** 1,3,2-Dioxathiolane,  
2,2-dioxide

**Trade Name:** ESA, DTD

**IES Order:** None

**Generic Name:** not  
CBI

### Chemical Structure

### Physical Chemical Properties

<b>Molecular Formula:</b> C2 H4 O4 S	<b>Molecular Weight:</b> 124.12
<b>% &lt; 500:</b>	<b>% &lt; 1000:</b>
<b>MP:</b> 95.00 - 97.00	<b>MP Estimate:</b>

<b>BP:</b>	<b>BP Pressure:</b>
<b>BP Estimate:</b> 209	
<b>VP (Torr):</b>	<b>VP Estimate (Torr):</b> 0.043
<b>Water Solubility (g/L):</b>	<b>Water Soluble Estimate (g/L):</b> 407
<b>Log P:</b>	<b>Log P Estimate:</b> -0.90
<b>Physical State — Neat:</b> Solid	<b>Physical State — Manuf:</b> NK: Import

**Physical State — Processing:** Solution: [REDACTED] LVE material in electrolyte formulation

**Physical State — End Use:** Solution: LVE material in electrolyte contained in lithium battery

### Additional Chemical Info

Submitted

Properties: MP = 96 °C. The IR spectrum is included with the PMN submission. Literature Properties: MP = 99 °C (Physprop); 96-97 °C, 99 °C (STN Prop file). Estimated Properties: BP = 209 °C (EPI), 231 °C (ACD); VP = 0.043 torr (EPI), 0.097 torr (ACD); WS = 407 g/L (EPI), 170 g/L (ACD); log P = -0.90 (EPI), -1.04 (ACD).

### Uses

<b>Consumer Use?</b> No	
<b>Use:</b>	Additive for use in lithium ion battery electrolyte formulations. [REDACTED]
<b>Other Uses:</b>	[REDACTED]

## Reaction Description

The LVE material is imported and a detailed manufacturing process is not provided by the submitter. The following description is from the abstract for

## Pollution Prevention Analysis(P2 Analysis:)

P2

Claim: Manufacturing facility has an impermeable epoxied floor to prevent release to ground/groundwater from indoors. All exits to the outside have passive flood diking to prevent interior spills from being released outside the building. The external loading dock has isolation valves to segregate storm drains from the environment during the movement of material outdoors. Storage and mixing vessels have immediate secondary containment around the vessels. All of these measures help to reduce potential human and environmental exposure to the NCS, resulting in an overall reduction in risk to human health and the environment.
